

Drester 1050

Aqueous Gun Cleaner

The Drester 1050 has been designed specifically to handle water based paints. Complete with built in flocculation and an effective double filtration system, it allows the user to reuse the water many times, dramatically reducing waste removal costs.

- Easy to use
- Low water consumption and superior recovery
- Efficient double filtration system with 10 gallon capacity
- 4 year pump warranty

Superior cleaning tools & large work space

Cleaning with pre-wash brush

Rinse using the flush gun

Flocculate & filter – Re-use Water – Reduce Waste

1. Add powder to soiled water

2. Agitate for 5-7 minutes

3. After 5 minutes paint particles will separate from the water and can be emptied into filter basket. The water can then be re-used and waste is reduced!

DRESTER

Drester 1050

Aqueous Gun Cleaner

Easy to use

Water borne paints are considerably harder to remove from spray guns than conventional paints. Therefore the Drester 1050 has been supplied with a pre-wash brush and a rinse gun. The brush and the rinse gun are fed with recycled water. The 1050 includes an air blow gun for drying after cleaning and a quick connect whip line for blowing out the spraygun paint channel. It can also be equipped with a Flush Gun, enabling use with other rinsing water/solvent as often provided by the paint manufacturers.

Low water consumption and recovery

Thanks to the effective cleaning and water reuse facility water consumption is low and the environmental impact is reduced. Water recovery is achieved by adding a flocculating agent when the Drester 1050 is full of soiled water. The liquid is agitated automatically with air. After filtration the water can be reused or pumped out through the brush.

Efficient filter system

The Drester 1050 ensures simple and efficient filtration of wash water. The paint remains are captured in a pre-filter which can be reused. A main filter traps the small particles in the liquid, resulting in clear, recycled water. The use of two filters assures a simple handling and increases the life of the main filter.

Powerful diaphragm pump

The Drester 1050 is equipped with the powerful Drester teflon diaphragm pump for a quick and efficient cleaning of the spray gun.

TECHNICAL DATA

Liquid volume	10 US gal (35 litres)
Working pressure	80-180 psi (5-12 bar)
Weight	46 lbs (21 kg)
Water flow through pre-wash brush	0,5 US gal/min (1.5 - 2 l/min)

Measurements

Height	41" (1050 mm)
Width	Ø 23" (590 mm)
